FUND PERFORMANCE

International Fund Performance

As our client, you have the opportunity to access an extensive range of top quality funds, hand-picked to maximise your investment opportunities. Most offer exciting potential for tax-efficient growth from a stable international location and each is managed by world-class professional asset managers. These funds range from the secure to those offering capital protection through to those aimed at the more adventurous client. In addition, each has been risk-rated to help you select the funds that most closely match your investment aims. A summary of each risk category is shown here. These funds are related to our full fund range of investment-linked assurance schemes and further details are available in our International Fund Selection Brochure.

Past performance is for indication only and is not a guide to future performance. Investment performance and return may go down as well as up. The performance figures are net of all fund charges but do not take account of any initial charge.

These performance figures should be read in conjunction with the relevant principal brochure, as fees and charges will impact negatively on individual investment returns.

This document should not be construed as a distribution, an offer to sell, or a solicitation to buy any funds by Generali International Limited in any particular jurisdictions or country where such distribution or use would be contrary to the laws or regulations of that jurisdiction.

Please note that funds not authorised by the Securities and Futures Commission ("SFC") in Hong Kong or by the Monetary Authority of Singapore ("MAS") are not available for offering to residents of those countries. Funds which are available for offering to residents of those countries are clearly indicated as such in this document.

LOW RISK RATING

These funds are for investors who require a high degree of security as they offer low risk growth potential.

MEDIUM/LOW RISK RATING

These funds are for investors seeking capital growth with some price volatility as they offer a broad spread of investments across major world markets.

MEDIUM RISK RATING

These funds are for investors seeking the potential of growth over the medium term as they invest in the world's major equity markets. However, it should be noted that the potential for superior growth is balanced by the increased risk of price fluctuations.

MEDIUM/HIGH RISK RATING

These funds are for investors seeking the potential of superior capital growth as they invest in the world's more specialist markets. However, it should be noted that the volatility in these markets increases the risk of loss.

HIGH RISK RATING

These funds are for investors seeking the possibility of fast appreciation of capital as they invest in individual sectors or emerging markets. However, it should be noted that although these markets have the potential to deliver high returns this can be offset by large falls during periods of adverse volatility. The high risk/reward ratio of these funds usually makes them suitable only for a small part of a structured portfolio.
