# FUND PERFORMANCE

# International Fund Performance

As our client, you have the opportunity to access an extensive range of top quality funds, hand-picked to maximise your investment opportunities. Most offer exciting potential for tax-efficient growth from a stable international location and each is managed by world-class professional asset managers. These funds range from the secure to those offering capital protection through to those aimed at the more adventurous client. In addition, each has been risk-rated to help you select the funds that most closely match your investment aims. A summary of each risk category is shown here. These funds are related to our full fund range of investment-linked assurance schemes and further details are available in our International Fund Selection Brochure.

Past performance is for indication only and is not a guide to future performance. Investment performance and return may go down as well as up. The performance figures are net of all fund charges but do not take account of any initial charge.

These performance figures should be read in conjunction with the relevant principal brochure, as fees and charges will impact negatively on individual investment returns.

**Please be advised that not all funds listed in this document are Hong Kong authorised. If they are not Hong Kong authorised, they are not available to Hong Kong investors. Please refer to the detailed fund fact sheet, available through our online Funds Platform, to ascertain if a fund is Hong Kong authorised or not.**

## **LOW RISK RATING**

These funds are for investors who require a high degree of security as they offer growth with little risk.

## **MEDIUM/LOW RISK RATING**

These funds are for investors seeking capital growth with some price volatility as they offer a broad spread of investments across major world markets.

## **MEDIUM RISK RATING**

These funds are for investors seeking the potential of growth over the medium term as they invest in the world's major equity markets. However, it should be noted that the potential for superior growth is balanced by the increased risk of price fluctuations.

## **MEDIUM/HIGH RISK RATING**

These funds are for investors seeking the potential of superior capital growth as they invest in the world's more specialist markets. However, it should be noted that the volatility in these markets increases the risk of loss.

## **HIGH RISK RATING**

These funds are for investors seeking the possibility of fast appreciation of capital as they invest in individual sectors or emerging markets. However, it should be noted that although these markets have the capacity to deliver high returns this can be offset by large falls during periods of adverse volatility. The high risk/reward ratio of these funds usually makes them suitable only for a small part of a structured portfolio.
