Important Notes

For Financial Advisers only. Not to be distributed to, nor relied on by, retail clients.

Where no performance data is available from Financial Express, this will be represented by a hyphen (-).

** Fund risk rating guide: Ratings range between 1 and 7. 1 = lower risk, potentially lower reward, 7 = higher risk, potentially higher reward. Please refer to the *Investment Guide* for more detailed information on the ratings.

*** Standard Deviation is a statistical measurement which, when applied to an investment fund, expresses its volatility, or risk. It shows how widely a range of returns varied from the fund's average return over a particular period. If a fund had an average return of 5%, and its volatility was 15, this would mean that the range of its returns over the period had swung between +20% and -10%.

Please note that past performance may not be repeated, therefore it must not be used as a guide to future performance. These figures have been prepared for information purposes only and are not an invitation to purchase an investment on the basis of information given, nor do they constitute investment advice. The price of units in the investment funds reflect the value of the underlying assets of the funds and can go down as well as up. Where a fund invests in overseas securities, the unit price may also rise and fall purely on account of exchange rate fluctuations. Royal London 360 Insurance Company Limited is not responsible for, and will not compensate Policyholders in relation to, the performance of their underlying funds.
